

Instructions to log in to your Google Account

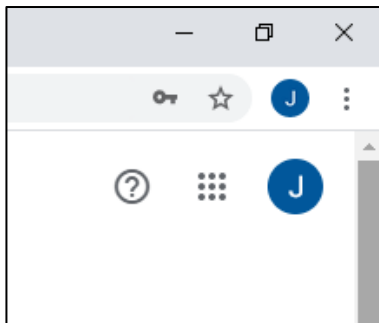

Step 1:

Go to google and click on the blue 'sign in' box at the top right. If this box is missing, type in <https://accounts.google.com/> and click the top link.

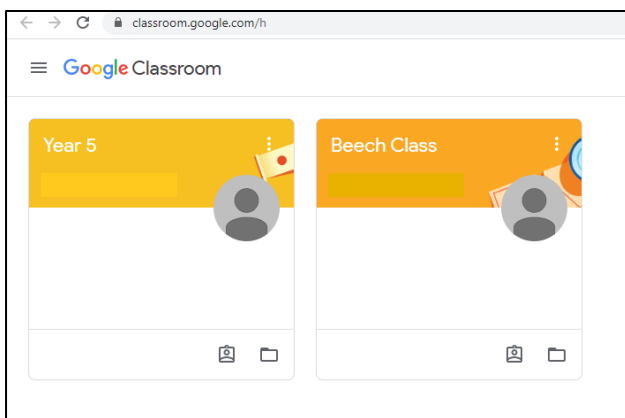

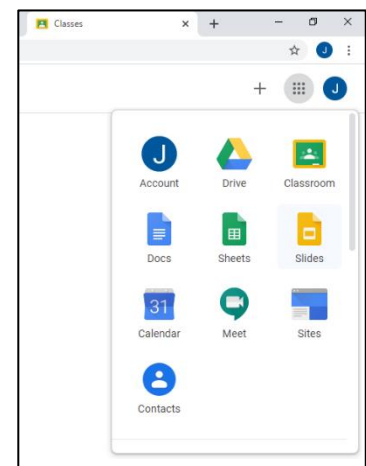

Step 2:

Enter your log in details. It should be your name and surname initial, followed by @north-kidlington.oxon.sch.uk
e.g. freds@north-kidlington.oxon.sch.uk

Step 3:

Once you have logged in, click on the waffle (9 dots that form a square) in the top right hand corner. Here you can choose Google Drive – where all your work is kept or Google Classroom – the place where your teacher sets you things to do.

Step 4:

Your classroom looks a little like this. You may need to click on a 'join' button to join the class if you haven't already. Sometimes you need a class code which your teacher can provide for you. Once you click on the classroom you can see the work you have been set and leave messages and comments.
